Comments: He is inexpensive (yet good quality) and delivers right to our school. He bills us (rather than expecting money when he delivers the shirts). He works with us in creating new designs and has good recommendations as to what will look good and what to avoid.

Comments: We had a great experience with this company. You can design your own shirt with simple online tools and then get some assistance with the details. They always deliver when promised. They have a pretty good tee-shirt color selection, as well. Their prices might be a bit on the high side, but worth it for the lack of problems. I have used them for SO and for baseball teams. Always high quality product. Great customer service.
